Code,Eclipse,Intellij

PROJECTS

Title:Full Stack Food Application,2024

I had developed this **Food application** by using **Spring boot** in Backend and **React** in Frontend.For Managing data by using **MySQL** database.This Application that bridges the gap between restaurants and food enthusiasts. This platform allows restaurant owners to effortlessly register their establishments while enabling customers to savor their favorite meals with unparalleled ease.

Title:Human Resource Management(HRM),2022

I had worked in a part of development team for building **HRM Module** which helps to know about employees attendance,payment process ,salary statement,PF&ESI process etc.
